

IGH Gene Clonality Master Mixes

For identification of clonal immunoglobulin heavy chain rearrangements.

RUO For RESEARCH USE ONLY. Not for use in diagnostic procedures.

Master mixes are components of complete assay/s. In general, the protocols used for all master mixes are identical, but some assays require different DNA polymerase volumes, methods of detection, and/or PCR program protocols. Therefore, it is important to refer to the specific assay product insert for the operating procedures. Product inserts are available on the web at www.invivoscribe.com. The product insert of interest will be found on the specific webpage of the respective assay.

This assay is based on the EuroClonality/BIOMED-2 Concerted Action BMH4-CT98-3936.
